**DETAILED ACTION**

1. The preliminary amendment filed on 12/19/2003 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- Regarding claim 1, the phrases "tube-like and piston-like" render the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

II- As to claim 1, the claimed limitation "holding element" as recited in line 2, and "holding element" as recited in claim 1, line 4, are vague and unclear because it is not clear if the claimed limitation in line 4, "holding element" is the same as the claimed limitation noted in line 2 above. Applicant should restructure the claimed language to prevent double inclusion throughout the claims.

III- Regarding claim 2, the phrase "piston-like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

IV- Regarding claim 3, the phrase "piston-like" render the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Duval 3,612,705.

Duval discloses a device for dispensing a spreadable material as seen in Figure 1, which comprises a tube (2) holding element having dispensing end, a tube base (10) at an end opposite the dispensing end, in which the holding element is arranged an internally screwthreaded, non-rotatable piston element (44) that carries the spreadable material and that is displaceable longitudinally from the tube base of the holding element to the dispensing end by an externally operated control wheel (26) provided at the tube base end of the holding element, the control wheel comprises an axially supported externally screwthreaded spindle (20) that extends rotatably through an opening in the tube base into the holding element and that co-operates with the internal screwthread of the piston element, wherein the screwthreaded spindle in a region adjoining the base has a non-screwthreaded region (24) that has an external diameter

Art Unit: 3754

smaller than the internal screwthread of the piston element as seen in Figure 1, so that when the piston element drawn adjacent to the tube base, the spindle is able to slip relative the piston element if it is rotated any further (col. 3, ll. 17-39).

***Allowable Subject Matter***

6. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Franta et al. 5,879,096, Lacout et al. 5,868,510, Hofmann 5,733,058, Dornbusch et al. 5,961,007, Schmidt 4,580,920, Iaia 5,573,341, Iaia 5,725,133 and Petit et al. 6,550,999 disclose other types of device for dispensing a spreadable material.
